

IV SAN BERNARD®

Fruit of the Groomer SPA Products to spoil your dogs and cats.

Spoiling your pet with a SPA therapy is as easy as 1 - 2 - 3

1

CLOSE
the cuticle

Dilute 1 part PEK OF YOUR CHOICE with 3 parts water in clean container. Wet the coat and apply. Let soak for full 5-10 minutes. Rinse.

2

OPEN
the follicle

Dilute 1 part SHAMPOO to 3 parts water in a clean container. Apply to coat. Soak for 5 full minutes. Rinse.

3

CLOSE
the skin & hair

Dilute 1 part PEK of your choice to 3 parts water in a clean container. Apply to coat. Soak for 5 full minutes. Rinse lightly.

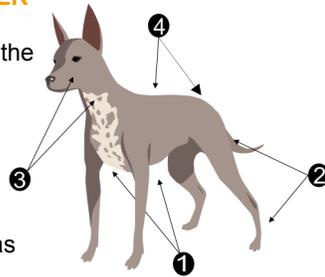

APPLYING FRUIT OF THE GROOMER PRODUCTS

For best results apply the products in the following order:

1. belly & chest
2. legs and feet
3. neck & face
4. back and bottom.

Let soak for **5 full minutes**.

This order covers the sebaceous areas first where most dirt and toxins enter

WHAT IS THE CLOSE-OPEN-CLOSE SPA THERAPY?

STEP ONE "CLOSE" This step closes the cuticle to protect it during the cleansing step.

STEP TWO: "OPEN" CLEANSE: This step opens the follicle to allow for gentle cleansing.

STEP THREE: "CLOSE" This step closes the skin & hair to retain hydration and give back the oils, minerals & collagen that were removed during the cleansing process. Never skip this step!

ABOUT THE PRODUCTS

Fruit of the Groomer products provide a light spa "close-open-close" bathing and hydrating experience while enjoying the fruity delights and silk proteins of coat specific shampoos and peks.

- **AMARENA (Black Cherry)** for short coats. Black Cherry with silk proteins, moisturizing and tonifying.
- **POMELMO ROSA (Pink Grapefruit)** for medium coats. Pink grapefruit with vitamins. Invigorating and tonifying action. Leaves the hair shiny and regenerated.
- **MARACUJA (Passion Fruit)** for long coats. Passion Fruit with proteins. Highly reinvigorating. Gentle enough to use for frequent washing, gives nourishment to the hair and leaves it silky and pleasantly scented.
- **ARANCIA (Orange)** for SHEDDING & Anti-stress! Strengthens with natural silicones, sebum-balancing, anti-hair loss and anti-stress. The combined action of citrus fruits and protective natural silicone helps prevent hair loss. Great elasticity, shine and a pleasant, soft feel throughout the coat.
- **ZENZERO SAMBUCA (Ginger/Elderberry)** for anti-itch and anti-bacterial with ginger for a purifying/sanitizing action. Contains OCTOPIROX a natural antiseptic to fight bacteria and reduce itching. Elderberry has antiseptic properties that fight bacteria. Leaves coat looking fluffy, shiny and silky.
- **MENTA (Mint)** for repairing with vitamin B6 and for fleas and ticks. Tonifying and refreshing mint with vitamin B6. Restructures the hair while restoring vitality. Mint is a natural deodorant and parasite repellent. Leaves hair feeling soft and silky.

Frequently Asked Questions:

How often should I do a SPA therapy on my pet? At least every 4-6 weeks if not more. As long as you do not skip STEP 3: Close/Hydrate you can bath 1x weekly if desired.

What if I don't know what coat type my pet has? Please visit our info site <http://isbusa.com/instructions/akc-breeds-by-coat-type/>

Why do I have to apply the products per your instructions? Since pets absorb dirt & toxins from the ground up into their sebaceous areas (tummy, feet, legs and other areas with less hair) it is important that the products are applied there first & allowed to soak for 5 full minutes.

Why do I have to let the product soak on the pet for 5 full minutes? In order to get the best results and never have to re-bathe, the products must soak a full 5 minutes on the pet. Also, it can take up to 5 minutes for the skin and hair to close or open depending on the step. During STEP 2 the cleanser molecules need time to attach to the offending molecules so they will lift and rinse off.

Can I do the steps together at the same time? Do not mix the steps of the SPA therapy as each product **must** work on it's own and be rinsed off before the next product is applied to get best results.

Why do I have to do the STEP 3 Close/Hydration? You must give back the oils, minerals, collagen and other nutrients for a full 5 min. that were washed away during the first 2 steps otherwise dry, itchy skin might occur and if the coat isn't given back enough hydration or the hydration step is skipped completely, the natural skin defense may over produce oils that cause odor. Make sure & always do a complete hydration step using the product generously.
