- ✓ LEISHMANIASIS
- ✓ ALOPECIA
- ✓ ITCHING
- ✓ WOUNDS
- ✓ BACTERIA
- ✓ INFLAMMATION
- ✓ SOOTHES ARTHRITIS
- MUCH MORE!

What is Ozone? Ozone (O₃) is an energized form of oxygen (O₂). Ozone is a naturally occurring component of fresh air. It can be produced either by the ultra- violet rays of the sun reacting with the Earth's upper atmosphere, which creates the protective ozone layer, or through an electrical discharge, such as lightening. But it can also be created artificially with an ozone generator. We have a special Hydro-Massage Ozone machine that has the ability to SAFELY & EFFECTIVELY generate O₃ while the pet is getting a skin therapy. Ozone is a powerful and rapid acting oxidizer, and will oxidize all bacteria, mold and yeast spores, organic material and viruses.

And it significantly speeds up healing!

O₃ is created in the ozone generator and released through the pad into the water.

Place the pet in the tub and submerge up the neck. Scoop ozonized water over remaining areas of the pet.

Ozone Therapy is done during the cleanse step (shampoo step) . For best effect, let the pet enjoy the spa for 10-15 minutes.

Due to the deep penetrating nature of the Ozone Hydro Massage, it is recommended to use only Iv San Bernard products.
