QR code on packaging for instant access to our certificate of analysis (COA); third party lab tested.

Why Dr. Fossum's?

A superb premium hemp tincture with competitive pricing.

Veterinarian-owned company with veterinary formulated products.

Premium ingredients USA sourced:

- no heavy metals
- no pesticides or herbicides
- no biological contamination

Proprietary formulation that is consistent from batch to batch.

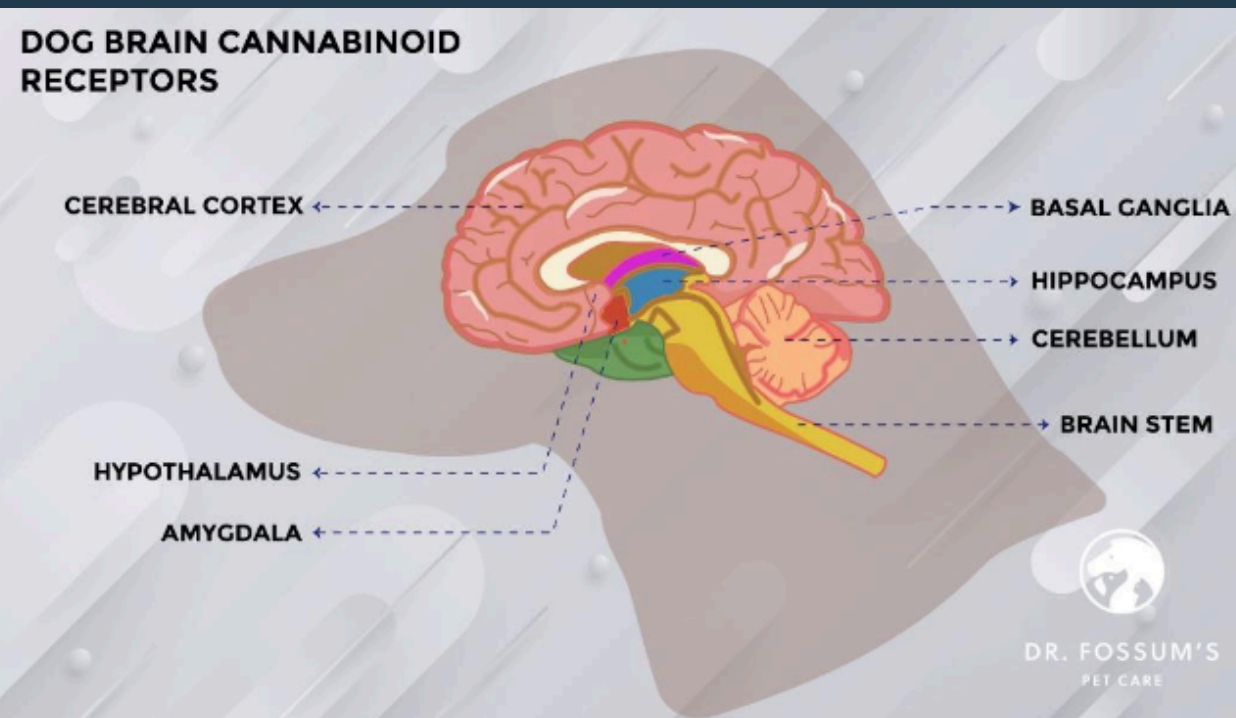

Flavoring to enhance palatability by species.

Syringe for measuring amount as compared to an inaccurate dropper.

Please register at our website www.drfosums.com and after completing a short questionnaire regarding your pet and your reason for using CBD you will receive a code for a discount off your first purchase.

How does CBD work?

CBD modulates numerous systems throughout the body including the immune system, endocrine (hormone) system and neurotransmitters. It works via receptors in the endocannabinoid (ECS) system.

Is it safe?

Yes, CBD appears to be safe in companion animals. While further studies are needed to inform dosing, route of administration, and indications, reported adverse side-effects are extremely rare and are not life-threatening.

How do I order?

If your veterinarian does not stock our product you can order it directly from our website:

www.drfosums.com

How do I give it?

Using the syringe that we have provided, try squirting the emulsion into the cheek pouch or on the tongue, where it will be rapidly absorbed.
