

# LUXURY PACKAGE

## Caviar

Our Caviar shampoo and conditioner contain Caulerpa Lentillifera extract (also known as vegetable caviar) and Omegas 3 and 6, which soften the coat, moisturize it and give it strength and vitality. The coat thus acquires a healthy and radiant appearance. These products are a luxurious option for the maintenance of long and medium coat types for both pets and show dogs.

## Black Passion

Our Black Passion shampoo and conditioner contain Argan Oil and extracts of Seaweed. It cleans gently, nourishes and strengthens hair, protecting it against free radicals and aging. It leaves the coat soft as silk and smelling amazing. These products are a luxurious option for the maintenance of short coat types for both pet and show dogs.

## Mineral Red

Mineral red is an extremely gentle, SLS free, super hydrating therapy for the coat. It is soothing and healing especially for pets with sensitive or itchy skin. Contains the soothing and strengthening properties of Keratin and Nettle.

## Luxury Line

These product lines contain the best of the best when it comes to high end ingredients and results. The different products are designed with extra minerals, collagen, and oils to give each coat type exactly what it needs to thrive. These lines are the ultimate in luxury and are regularly used by competition groomers, show handlers, and pet owners alike. We recommend using these products several times on each dog to get the full effect of their benefits as the results will only increase with each bath. For best results, please bathe using our frothing bathing technique.

### *Recommended Bathing Technique*

For optimal results, we recommend our frothing bathing technique. For this technique, you will mix 1 part product with 3 parts water and then use a frothing wand to whip the product into a thick foam. This foam can then easily be applied all over the pet without risk of product going down the drain. For the most effective application, apply to the face, throat, underbelly, sanitary areas and paws first as these will be the most dirty regions. Once the product has been applied all over the pet, let it sit on the pet for at least 5 mins so the product has time to do its job. If you give the product at least 5 mins to sit on the coat, you should never have to bathe twice. Conditioner should be applied in the same way.
